

## **HOW TO HELP A BROTHER IN NEED**

Don't despicably pity your neighbor, he is your brother. Limited yourself don't judge him, because you don't know why your brother has a certain kind of behavior. You don't know his story, you don't know his fears, his sadness, everything he's lived, how can you judge him?

Unfortunately, he has had situations in his life that have led to a certain behavior and he does not even know why of certain attitudes.

First feed him, water him, help him, that means that you love him, then you can bear your witness of love to your God.

Then he may believe you, but not before. Even after you have fed, watered, rescued, however, you must continue to take care of him, because otherwise you would not be credible.

Above all, give him human warmth, take care of his life, his affections, his needs. Assist him, even if he shows no gratitude. The lack of everything may have made him sterile in the heart, also because a human being often confronts himself with the other and when he does not have the necessary, his soul becomes dry.
