

## **SIN AND PURIFICATION**

There is so much evil and the men are paying everyone through purification. Man by his nature has purify himself for its offspring of sin. Now sin is social and is very intense, very frequent so that the purification becomes even more necessary, since the man has lost his God. Nothing is done according to God, to trust in God, but only according to me and to my every need. Everyone sin, nobody cares most of holy laws that are applied, so how can we live in a world near to people nicked from evil? It's as if we were all intoxicated, nobody can "breathe", it lacks the breath of the soul, the soul that God has placed in my being for the spiritual resource of each man. So if the soul is tainted, so here it is affected also the body with various illnesses and hardships, the family intolerances, wars and every other difficulty that makes difficult to live. There is also a existential discomfort of the whole being of man, and then this purification is indispensable. Suffering is like a wash, a cleaning of spirit and body.
